- Web App Application**  
 Project Highlight – From Web App to Mobile App!  
Developed responsive and interactive web applications using HTML, CSS, and JavaScript. Learned and applied the process of converting web applications into Android apps using TinyHost and Web to App platforms. Gained hands-on experience in frontend development, UI/UX design principles, and deployment of web apps. Improved skills in problem-solving, debugging, and adapting web content for mobile platforms.
- AI Fusion**  
 Project Description:  
I developed AI Fusion, a web-based application that integrates intelligent chatbots using custom APIs hosted on localhost. This project showcases how AI-powered bots can interact with users in real-time for various tasks like answering questions, giving suggestions, and simulating conversations.
